

TYTECHNIQUES SOLUTIONS
ALL YOUR FINGERPRINT SOFTWARE NEEDS ARE SURPASSED!

WELCOME

TYTRANSFER IS A FINGERPRINT LOGIN TOOL THAT INTERFACES WITH ANY WINDOWS PC APPLICATION OR WEB APPLICATION WITHOUT ANY INTEGRATION TO ELIMINATE TYPING IN A USERNAME AND OR PASSWORD/PIN AND REPLACE IT WITH A SECURE BIOMETRIC FINGERPRINT SIGN ON WITHIN MINUTES.

Biometric Data Privacy: The software converts the fingerprint to a mathematical template which is then encrypted and stored on your PC. In every fingerprint, there are data points unique to that finger. That constellation of points is what gets translated into a mathematical template.

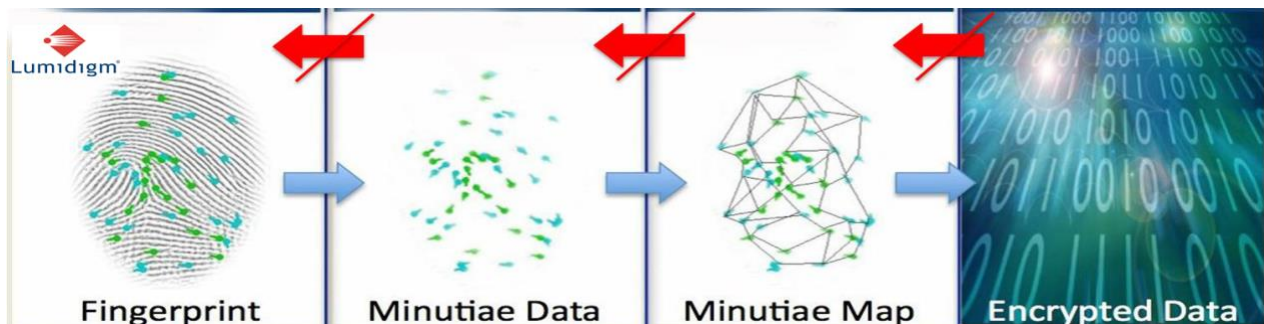

Figure 1 Converted from fingerprint to binary template

Visit <https://tytechnique.com/tytransfer> to order your keyboard wedge fingerprint scanner.
